

Plymouth Elementary School

WEEK IN REVIEW

(Just a few highlights)

April 5- 9

PES's answer to "What did you do in school today?"

The students have contributed one again to our weekly newsletter:

P.E.

By Julia

This week during, P.E. on Tuesday and Thursday, the 3-6 graders have been learning to play basketball. We learned the new skills on the school's basketball court. We learned new vocabulary words like dribble and "shooting hoops". We played dribble tag. This is when you dribble the ball, keeping control of your own ball, while you try to knock out another player's ball.

Science

By Andrew

While Mrs. Davis was gone we had Mrs. J (Josselyn) for a substitute teacher. We learned how to write up and perform science experiments. The class wanted to see what would happen to soap placed in a microwave for 2 minutes. There are 2 microwaves in the multi-purpose room, so that is where we did the experiment. We observed the Ivory soap expanding into a big cloud in the microwave. We learned that Ivory soap floats and expands in a microwave because it is filled with air.

Recess

By Jillian

Recess is much more fun now that the snow is gone. We can play "tag" without slipping and sliding and trudging through the deep snow. We don't have to wear our heavy, baggy snow clothes. It feels like summer is on its way.

REMINDERS & THANK YOUs:

- Thank you Mrs. Josselyn for substituting while Mrs. Davis traveled to be with her family during a very sad time. Our thoughts and sympathies were with Mrs. Davis and we are happy to have her back.
- We have decided to cancel our bowling trip on April 16. We are very aware of the expense this causes, and would prefer to concentrate on our end-of-year trip at this point.
- **SAVE THE DATE:** We have scheduled our Spring Concert for Wednesday, May 19; 6:00 p.m. Hope to see everyone there!

- Still looking for people to interview for our Plymouth school History Project. Please spread the word, call school for more info 672-3666- Thank you!
